

Growing Always Starts with the Best Base

Introduction

Shakti Cocos B.V. originated from van der Gaag Potgrond B.V., a family business with several generations of experience in potting soil and substrates for professional horticulture. With the emergence of cocos as a substrate in the 1980s, the need arose to have control over quality, product developments and delivery reliability. From this realization, **Shakti Cocos B.V.** is one of the first companies in the world to have started with their own investments in India and Sri Lanka for the production of high quality and reliable coir substrates. **Shakti Cocos B.V.** started as a pioneer but is now one of the leading companies in the production and development of coir substrates.

Shakti Cocos B.V.

Shakti Cocos B.V. is a **Partner** and **Pioneer**, **Dependable** and **Innovative**, always on the lookout for the best substrate so as to get the **maximum** out of your crop, together with **you**. Choosing for **Shakti Cocos B.V.** means choosing for years of **experience**, the **best raw materials**, **dedicated people** and **tailor-made** substrates.

Shakti Cocos B.V. focuses on the **production** and **development** of **Coir substrates** at three locations in South East **India** and two locations in **Sri Lanka**. The coir substrates from **Shakti Cocos B.V.** are supplied **all over the world** either via **dealers** or **directly**.

The mixtures are formulated in consultation between you as a **grower** and **our advisers**, based on your needs and circumstances. During the cultivation, our consultants provide you with **advice** and **assistance** in order to get the maximum out of the substrates supplied.

In consultation with you as customer, **Shakti Cocos B.V.** produces the coir **quality** that best suits your crop and your needs. The desired **physical mixture** is made by mixing different coir products such as **Coir pith**, **Coir crush** and **Coir fibre** and the desired chemical substrate is made by means of washing or processing. The coir substrates are available from **Shakti Cocos B.V.** in compressed **5 kg blocks**, **Easy Fill Bags**, **Coir Growbags**, **50-ltr bags** and customer specific packaging and dimensions.

Thanks to a large stock of raw materials and its own storage halls, **Shakti Cocos B.V.** is able to deliver **all year round**.
